EMSB Implementation of AADP

Microsoft Identity Manager and Automatic Account Provisioning

Agenda

- ▶ Problem definition
- ▶ Solution
- ▶ Benefits
- ▶ Timeline

Problem Definition

- ▶ Frequent movement of personnel
- ▶ Increasing complexity of security group allocations
- ▶ User issues with increased password change requirements
- ▶ 15%-25% of support calls related to lost or forgotten passwords
- ▶ Addition of 1000 occasional users to the system
- ▶ 30%-50% FTE associated with user account management, and increasing

Solution

- ▶ Leverage existing licensing of AD and Office 365
- ▶ Integration with GRICS platforms; HR/PAIE, GPI/JADE
- ▶ Integration of Azure and MIM platforms
- ▶ Automatic creation and modification of user accounts
- ▶ Automatic creation and modification of security groups
- ▶ Implement password self-service reset

Benefits

- ▶ Improved security; consistency and timely
- ▶ Reduction of errors
- ▶ Easily implement security changes as necessary
- ▶ Elimination of FTE requirements
- ▶ Address external auditor security concerns
- ▶ Automatic account creation in 24hrs of data put into GRICS systems

Thank you
